Subject Index for Volume 36

Acid/base indicator
polyaniline; reaction stoichiometry and use as ion-exchange polymer and, 209
Aluminum
graphite–$AlCl_3$, $\hat{c}$-axis resistivity in, as found by CESR measurements, 235
intercalation of $AlCl_3$ into stage 3 $FeCl_3$-GIC, 399
Aniline black (polyaniline)
process leading to domain structure of, 35
$\hat{c}$-Axis resistivity
in graphite–$AlCl_3$ as found by CESR measurements, 235

Band structures
of substituted polyacetylene–Be systems, study using through-space/bond interaction analysis for, 1
BEDT-TTF salts
diamagnetic properties of organic superconductor κ-(BEDT-TTF)$_2$-$Cu(NCS)_2$, 27
Benzene
poly(*p*-phenylene) obtained by electrochemical oxidation of, in Bu-PyCl–$AlCl_3$ melt, investigation of, 217
Beryllium
polyacetylene–Be systems, study using through-space/bond interaction analysis for band structures of substituted, 1
Bipolarons
will bipolarons be formed in heavily oxidized polyaniline?, 129
Biscyanophthalocyaninato metal complexes
cyclic voltammetric and electrocrystallization studies of axially substituted, and related compounds, 387
BuPyCl–$AlCl_3$ melt
investigation of poly(*p*-phenylene) obtained by electrochemical oxidation of benzene in, 217

CESR measurements
$\hat{c}$-axis resistivity in graphite–$AlCl_3$ as found by, 235
Charge-density wave
contribution of moving, to thermoelectric kinetic coefficients, 381
Charge-transfer complexes
radical salts as, between aromatic diamines and their diiminium cations, 263
Charge transport
fibrillar electronically conductive polymers show enhanced rates of, 275
Charged soliton state
in polyacetylene, investigation of, using PPP method, 229
Chronovoltabsorptometric characterization
of poly(isothianaphthene), novel synthesis, spectroelectrochemical, electrochemical and, 303
Conducting polymer
poly(bis-(2,5-*N*-methylpyrrylene)vinylene), new, 55
Conducting properties
conjugated heterocyclic copolymers; correlation between electronic structures and, 195
Conductive polymers
fibrillar electronically, show enhanced rates of charge transport, 275
Conductivity
of foam polypyrrole, anomaly in temperature dependence of electrical, 253
in 'metallic' polyacetylene, temperature dependence of, 367
of polypyrrole film, enhancement of electrical, by stretching; influence of polymerization conditions, 241
Conjugated heterocyclic copolymers
correlation between electronic structures and conducting properties, 195
Copper
diamagnetic properties of organic superconductor κ-(BEDT-TTF)$_2$-$Cu(NCS)_2$, 27
Cyclic voltammetric studies
of axially substituted biscyanophthalocyaninato metal complexes and related compounds, and electrocrystallization, 387

Elsevier Sequoia/Printed in The Netherlands

Diamagnetic properties
of organic superconductor κ-(BEDT-TTF)$_2$Cu(NCS)$_2$, 27
Diamines
radical salts as charge-transfer complexes between aromatic, and their diiminium cations, 263
Diquinone radical anion salt
structure of conductive, diamagnetic, 65
Domain structure
of aniline black (polyaniline), process leading to, 35

Electrical conductivity
of foam polypyrrole, anomaly in temperature dependence of, 253
of polypyrrole film, enhancement of, by stretching; influence of polymerization conditions, 241
Electrical properties
of poly(2,5-thienylene vinylene) fibers, 183
Electroactivity
tuning of aqueous, of substituted poly(thiophene)s by ether groups, 267
Electrochemical characterization
of poly(isothianaphthene), novel synthesis, spectroelectrochemical, chronovoltabsorptometric and, 303
Electrochemical oxidation
investigation of poly(*p*-phenylene) obtained by, of benzene in Bu-PyCl–AlAl$_3$ melt, 217
Electrochemical synthesis
of polyconjugated polyfuran, and characterization, 337
Electrocrystallization studies
of axially substituted biscyanophthalocyaninato metal complexes and related compounds, cyclic voltammetric and, 387
Electronic structures
conjugated heterocyclic copolymers; correlation between, and conducting properties, 195
Emeraldine
insulator-to-metal phase transition, resonance Raman spectroscopy of, 83
Ether groups
tuning of aqueous electroactivity of substituted poly(thiophene)s by, 267

Graphite
–AlCl$_3$, *ĉ*-axis resistivity in, as found by CESR measurements, 235
Graphite intercalation compounds
effect of metal concentration on superconducting properties of Li-, Na- and K-containing, 283
intercalation of AlCl$_3$ into stage 3 FeCl$_3$-GIC, 399

Intercalation
of AlCl$_3$ into stage 3 FeCl$_3$-GIC, 399
Ion-exchange polymer
polyaniline; reaction stoichiometry and use as, and acid/base indicator, 209
Iron
intercalation of AlCl$_3$ into stage 3 FeCl$_3$-GIC, 399

Kinetic coefficients
contribution of moving charge-density wave to thermoelectric, 381

Lithium
effect of metal concentration on superconducting properties of Li-, Na- and K-containing graphite intercalation compounds, 283

Magnetic properties
of spin-labelled polyacetylene, 353
Mechanical properties
of poly(2,5-thienylene vinylene) fibers, 183
Metal complexes
cyclic voltammetric and electrocrystallization studies of axially substituted biscyanophthalocyaninato, and related compounds, 387
Metal concentration
effect of, on superconducting properties of Li-, Na- and K-containing graphite intercalation compounds, 283

Organic dyes
study of semiconductive materials prepared by pyrolytic treatment of, 47
Organic superconductor
κ-(BEDT-TTF)$_2$Cu(NCS)$_2$, diamagnetic properties of, 27

Phase transition
emeraldine insulator-to-metal, resonance Raman spectroscopy of, 83
Polyacetylene
–Be systems, study using through-space/bond interaction analysis for band structures of substituted, 1
charged soliton state in, investigation of, using PPP method, 229
magnetic properties of spin-labelled, 353
temperature dependence of conductivity in 'metallic', 367
Polyacetylene chain(s)
interaction of two solitons on two *trans*-, 75
propagation of charged solitons in, 41
Polyaniline(s)
will bipolarons be formed in heavily oxidized?, 129
historical survey, 139
process leading to domain structure of aniline black, 35
reaction stoichiometry and use as ion-exchange polymer and acid/base indicator, 209
static secondary ion mass spectrometry (SIMS) of; preliminary study, 103
Polyaniline films
high-resolution XPS studies of electrochemically synthesized conducting, 111
Poly(bis-(2,5-*N*-methylpyrrylene)vinylene)
new conducting polymer, 55
Polyfuran
electrochemical synthesis and characterization of polyconjugated, 337
Poly(isothianaphthene)
novel synthesis, spectroelectrochemical, electrochemical and chronovoltabsorptometric characterization of, 303
Polymerization conditions
enhancement of electrical conductivity of polypyrrole film by stretching; influence of, 241
Polymers
theoretical search for low-gap, based on polythiophene, 327
Poly(*p*-phenylene)
obtained by electrochemical oxidation of benzene in BuPyCl–$AlCl_3$ melt, investigation of, 217
Polypyrrole
anomaly in temperature dependence of electrical conductivity of, 253
Polypyrrole film
enhancement of electrical conductivity of, by stretching; influence of polymerization conditions, 241
Poly(2,5-thienylene vinylene) fibers
mechanical and electrical properties of, 183
Poly(2,5-thienylene vinylene) films
preparation of high-quality, 95
Polythiophene(s)
theoretical search for low-gap polymers based on, 327
tuning of aqueous electroactivity of substituted, by ether groups, 267
Potassium
effect of metal concentration on superconducting properties of Li-, Na- and K-containing graphite intercalation compounds, 283
PPP method
investigation of charged soliton state in polyacetylene using, 229
Pyrolytic treatment
study of semiconductive materials prepared by, of organic dyes, 47

Radical anion salt
structure of conductive, diamagnetic diquinone, 65
Radical salts
as charge-transfer complexes between aromatic diamines and their diiminium cations, 263
Reaction stoichiometry
polyaniline; and use as ion-exchange polymer and acid/base indicator, 209
Resonance Raman spectroscopy
of emeraldine insulator-to-metal phase transition, 83

Secondary ion mass spectrometry (SIMS)
static SIMS of polyanilines; preliminary study, 103
Semiconductive materials
prepared by pyrolytic treatment of organic dyes, study of, 47
Sodium
effect of metal concentration on superconducting properties of Li-, Na- and K-containing graphite intercalation compounds, 283
Solitons
interaction of two, on two *trans*-polyacetylene chains, 75

propagation of charged, in polyacetylene chain, 41
Spectroelectrochemical characterization
of poly(isothianaphthene), novel synthesis, electrochemical, chronovoltabsorptometric and, 303
Spectrometry
static SIMS of polyanilines; preliminary study, 103
Spectroscopy
resonance Raman, of emeraldine insulator-to-metal phase transition, 83
Structure
of conductive, diamagnetic diquinone radical anion salt, 65
Superconducting properties
effect of metal concentration on, of Li-, Na- and K-containing graphite intercalation compounds, 283
Synthesis
of poly(isothianaphthene), novel, spectroelectrochemical, electrochemical and chronovoltabsorptometric characterization, 303

Temperature dependence
of conductivity in 'metallic' polyacetylene, 367
of electrical conductivity of foam polypyrrole, anomaly in, 253
Theoretical search
for low-gap polymers based on polythiophene, 327
Thermoelectric kinetic coefficients
contribution of moving charge-density wave to, 381
Through-space/bond interaction analysis
study using, for band structures of substituted polyacetylene–Be systems, 1

XPS studies
high-resolution, of electrochemically synthesized conducting polyaniline films, 111
